VIEW AND REDLINE

CONSTRUCTION AND REAL ESTATE PROJECTS GENERATE AN ASSORTMENT OF ELECTRONIC FILES THAT INCLUDE PHOTOS, CAD FILES, ADOBE® PDF FILES, DRAWINGS — EVEN DIGITALLY SCANNED NAPKIN SKETCHES. WHILE ANY PICTURE MAY BE WORTH A THOUSAND WORDS, THE VALUE OF VISUAL DOCUMENTS ON A CONSTRUCTION PROJECT STEMS FROM CLEARING UP CONFUSION AND IMPROVING COLLABORATION. DESPITE THE BENEFITS VISUAL FILES OFFER, MANAGING MULTIPLE FORMATS AND VERSIONS, AND THE FORUMS FOR COMMENTS AND DISCUSSION, CAN CREATE A TANGLED NETWORK OF DETAILS.

The Proliance® View & Redline business application simplifies document management and facilitates collaboration by allowing project participants to view and redline unstructured data like CAD files, digital images, Adobe PDF files, Word files, and other project-related files. View and Redline lets team members mark up, measure, annotate, and communicate with other participants using an online visual reference.

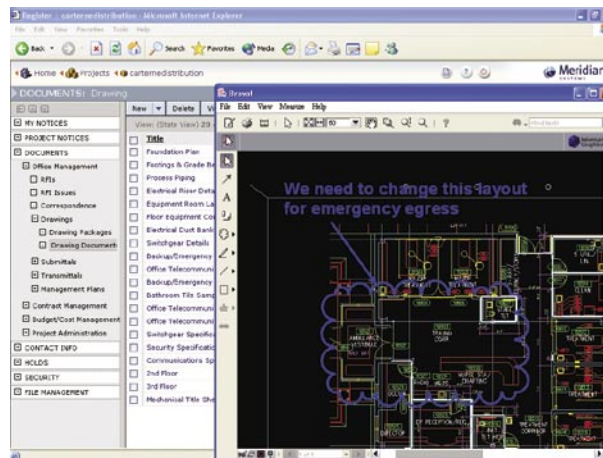

View & Redline is powered by the Brava!® product family by Informative

Graphics Corporation (IGC), a leading provider of commercial software for content visualization, web publishing and collaboration.

View & Redline compliments the File Management features of Proliance's platform by easily enabling file sharing, workflow processing, and audit-trail tracking of non-XML, or unstructured, documents.

Proliance utilizes powerful catalog cards to represent each electronic file and its unique attributes. The data-packed catalog cards enable Proliance to manage document version control and workflow approval process, and enable non-XML documents to link with other Proliance Xdocs.

PROJECT PARTICIPANTS CAN VIEW AND REDLINE UNSTRUCTURED DATA LIKE CAD FILES, DIGITAL IMAGES, ADOBE PDF FILES, WORD FILES, AND OTHER PROJECT-RELATED DOCUMENTS.
